DETAILS:

NAME: HARESH KARTHIKEYAN
ROLL NUMBER:EE26B058
CURRENT PORs: Volunteer at Shaastra Evolve
WHY ABHIYAAN: I have been interested in autonomous cars ever since Elon Musk came up with the robo taxi idea and I saw videos of google waymo. I think it is a wonderful sector to develop my skills in and I am sure that these skills would be really helpful to develop a wider horizon for my career options. Also since I am interested in core electronics and eager to learn about them, their use in Autonomous cars are pivotal and would again be a wonderful opportunity to explore and learn. Even when applying for this there was so much to learn and explore, like how a CAN works, reality checks on even simple things like wheel tracking and how we can work around them. The PCB question was the one that really excited me, I tried learning and implementing as much as I could. It was a very enriching app!!
HRS PER WEEK: I am not sure of my role as a volunteer and also how my further sems are going to be but I am confident I will be able to allot at least 10-15 hrs a week for Abhiyaan.
QUESTIONS ATTEMPTED: 1 and 5, 3 partially
